CROWN FLOW COUNTER DISPENSER

Chilled | Boiling | Sparkling

Built In UV Module

The Sovereign CrownFlow is a sleek and compact countertop water dispenser designed to deliver instant Boiling Chilled & Sparkling Filtered Water with commercial-grade performance and style. Engineered for space-conscious environments, CrownFlow combines modern aesthetics with practical functionality—making it ideal for offices, meeting rooms, staff kitchens, healthcare, and customer-facing areas.

The unit features a touch-button interface for intuitive operation and is equipped with an intelligent efficiency controller, which automatically powers the system down during periods of inactivity to reduce energy usage without impacting readiness.

Designed around a durable, NSF-rated build, the CrownFlow offers long-term reliability with minimal maintenance. For enhanced water quality, it can be paired with a Sovereign Water Treatment System (sold separately), including Reverse Osmosis (RO) options tailored to local water conditions.

With its compact footprint and high-output performance, the CrownFlow countertop dispenser is the perfect choice for environments that demand convenience, quality, and style—all in one.
