# CROWN FLOW COUNTER & FLOORSTANDING DISPENSER

## Chilled | Boiling | Sparkling | Ambient

The Sovereign CrownFlow Floorstanding is a refined, high-capacity water dispenser designed to deliver instant Boiling, Chilled, Sparkling and Ambient filtered water with commercial-grade performance and a modern aesthetic.

Purpose-built for environments that require both volume and durability, this floorstanding model brings the same engineering excellence as the countertop version, but with a self-contained base for areas where counter space is limited or unavailable.
Featuring an intuitive touch-button interface, the CrownFlow Floorstanding offers effortless operation for users. Its intelligent efficiency controller reduces energy consumption by powering the system down during periods of inactivity, while maintaining instant readiness throughout the day.

Constructed with a robust, NSF-rated build, the unit is engineered for long-term reliability and minimal maintenance. For superior water quality, it can be paired with a Sovereign Water Treatment System, including Reverse Osmosis (RO) options tailored to the site's water conditions.
With its freestanding design, high output capacity, and premium finish, the CrownFlow Floorstanding dispenser is ideal for offices, staff kitchens, hospitality spaces, healthcare facilities, and customer-facing environments that demand convenience, quality, and a professional look.

Built In UV Module
